Warranty Walter Borst expressly disclaims any warranty for the software package. This software package and related documents are provided "As Is".

However, this software package was developed to the best of my knowledge and my belief. The basis is the specifications of the Hart Communication Foundation in version 7.9.

However, it cannot be guaranteed that the software included in this package meets the HCF specifications in all required respects.

It is only possible to prove the conformity of this software after the user has integrated the software into his device and commissions HCF or a certified company to carry out a conformance test.

Validity The quotation is valid for three months since the download of this file.
